

# BEYOND TRADITIONAL DEVOPS

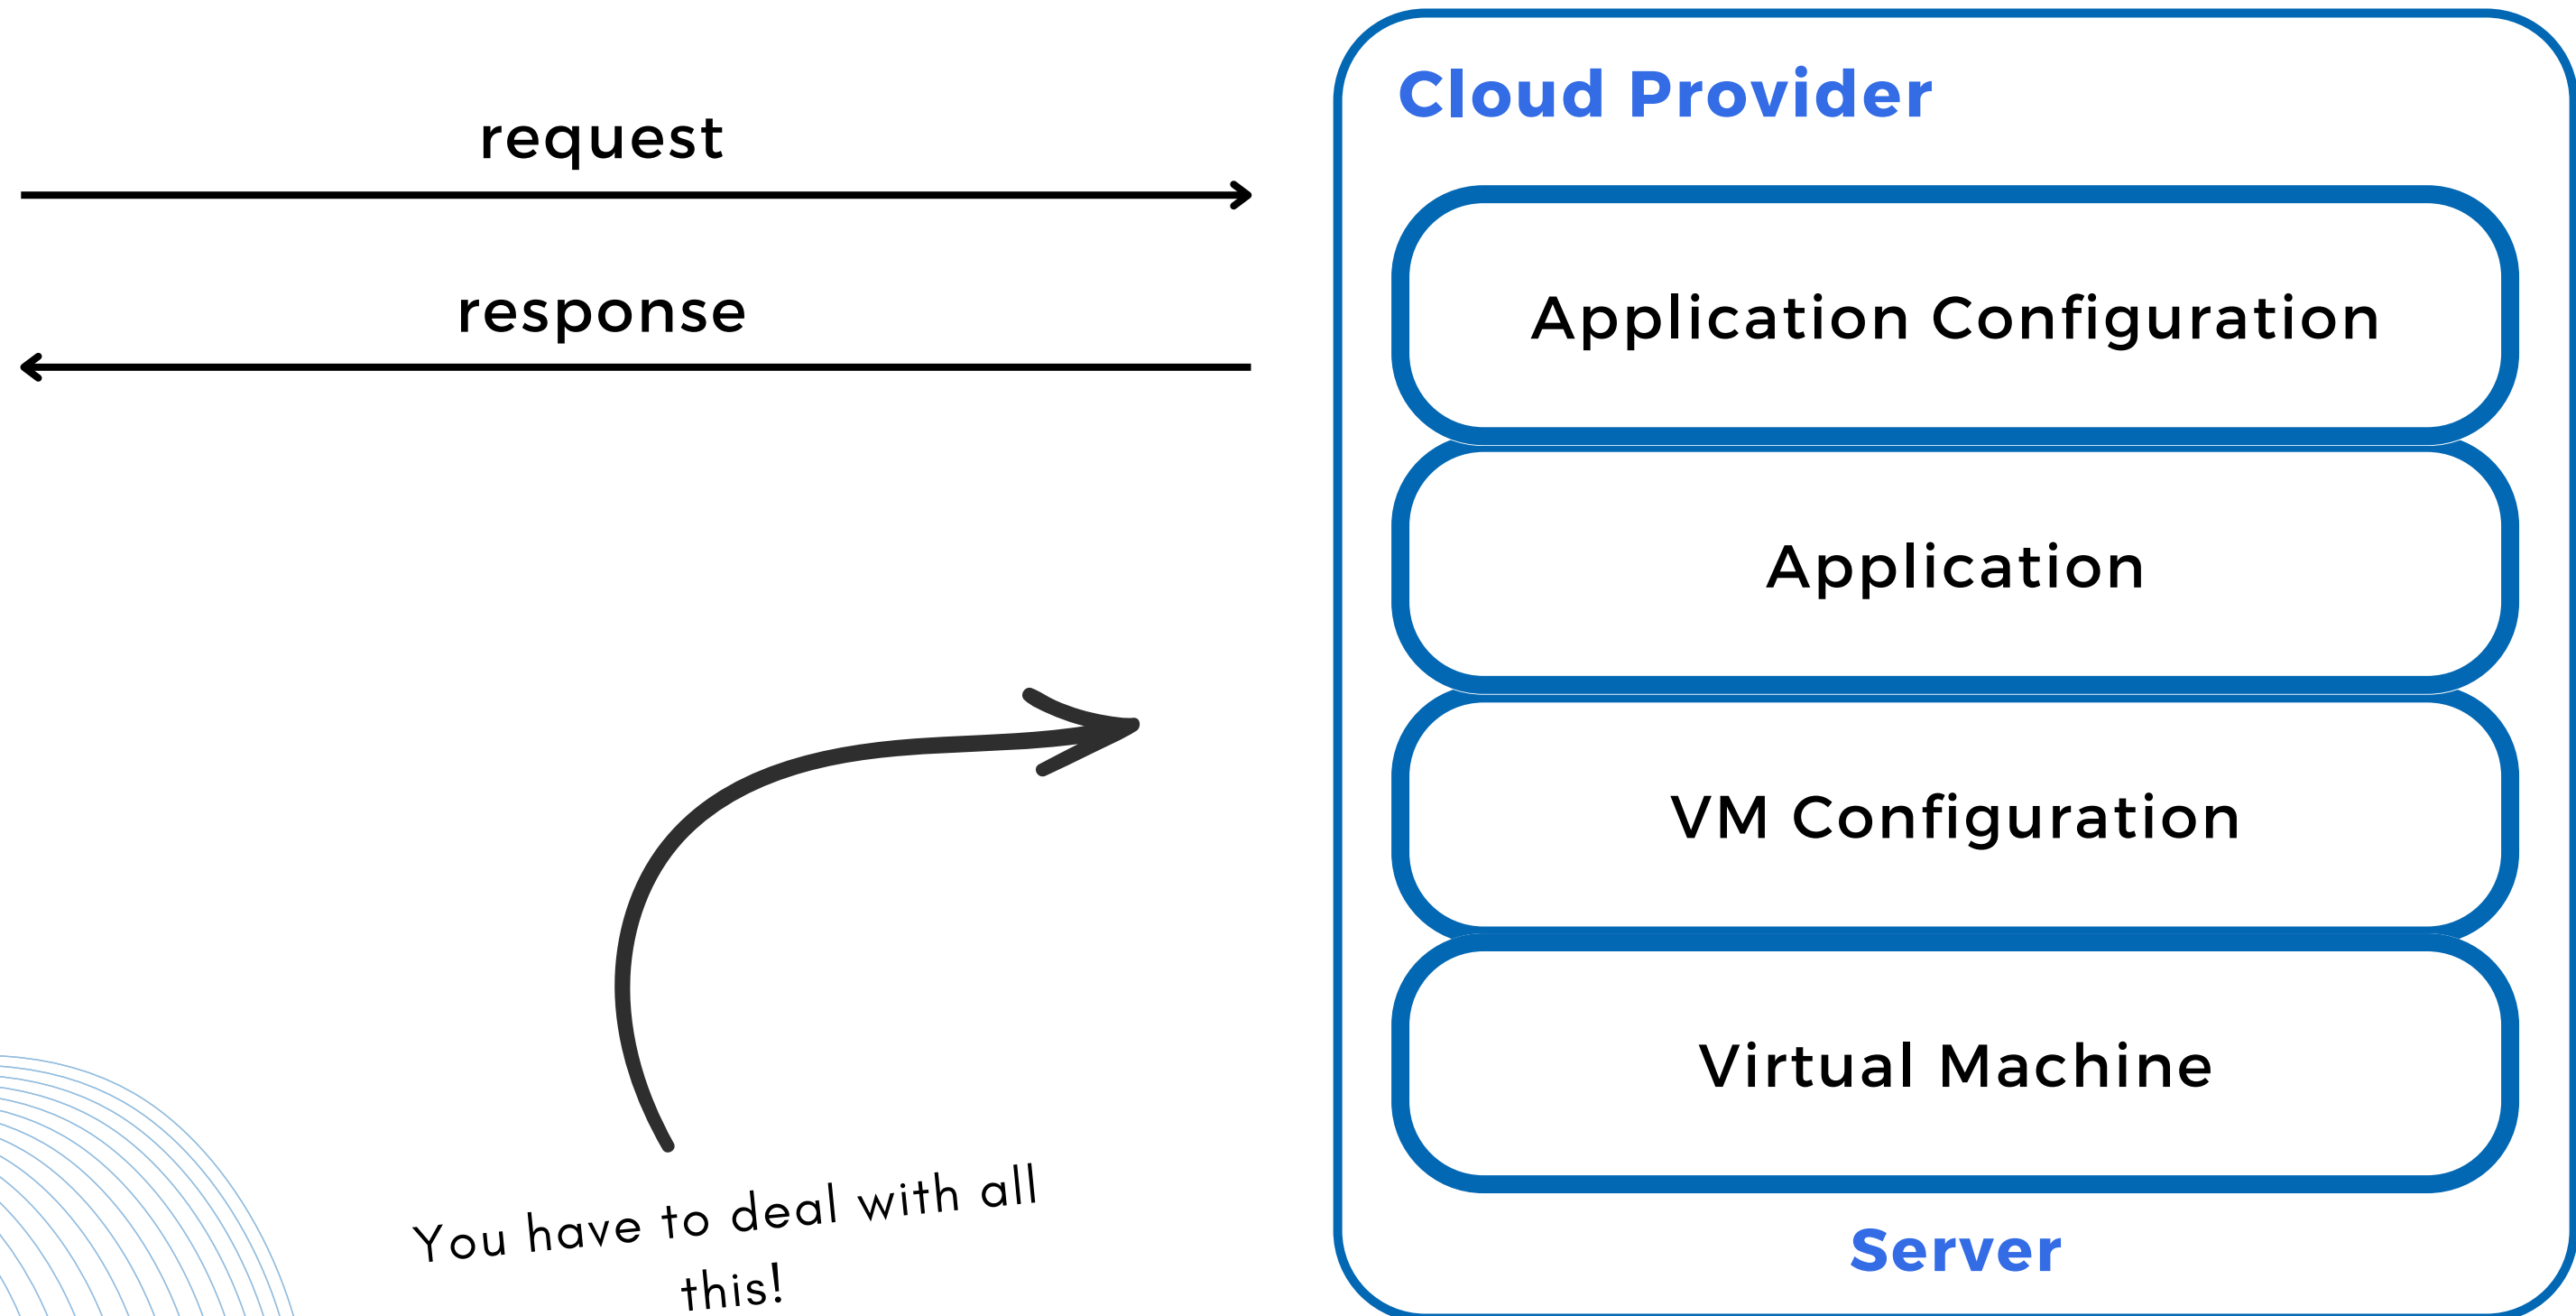

A Dive into Serverless with  
Kubernetes using Knative

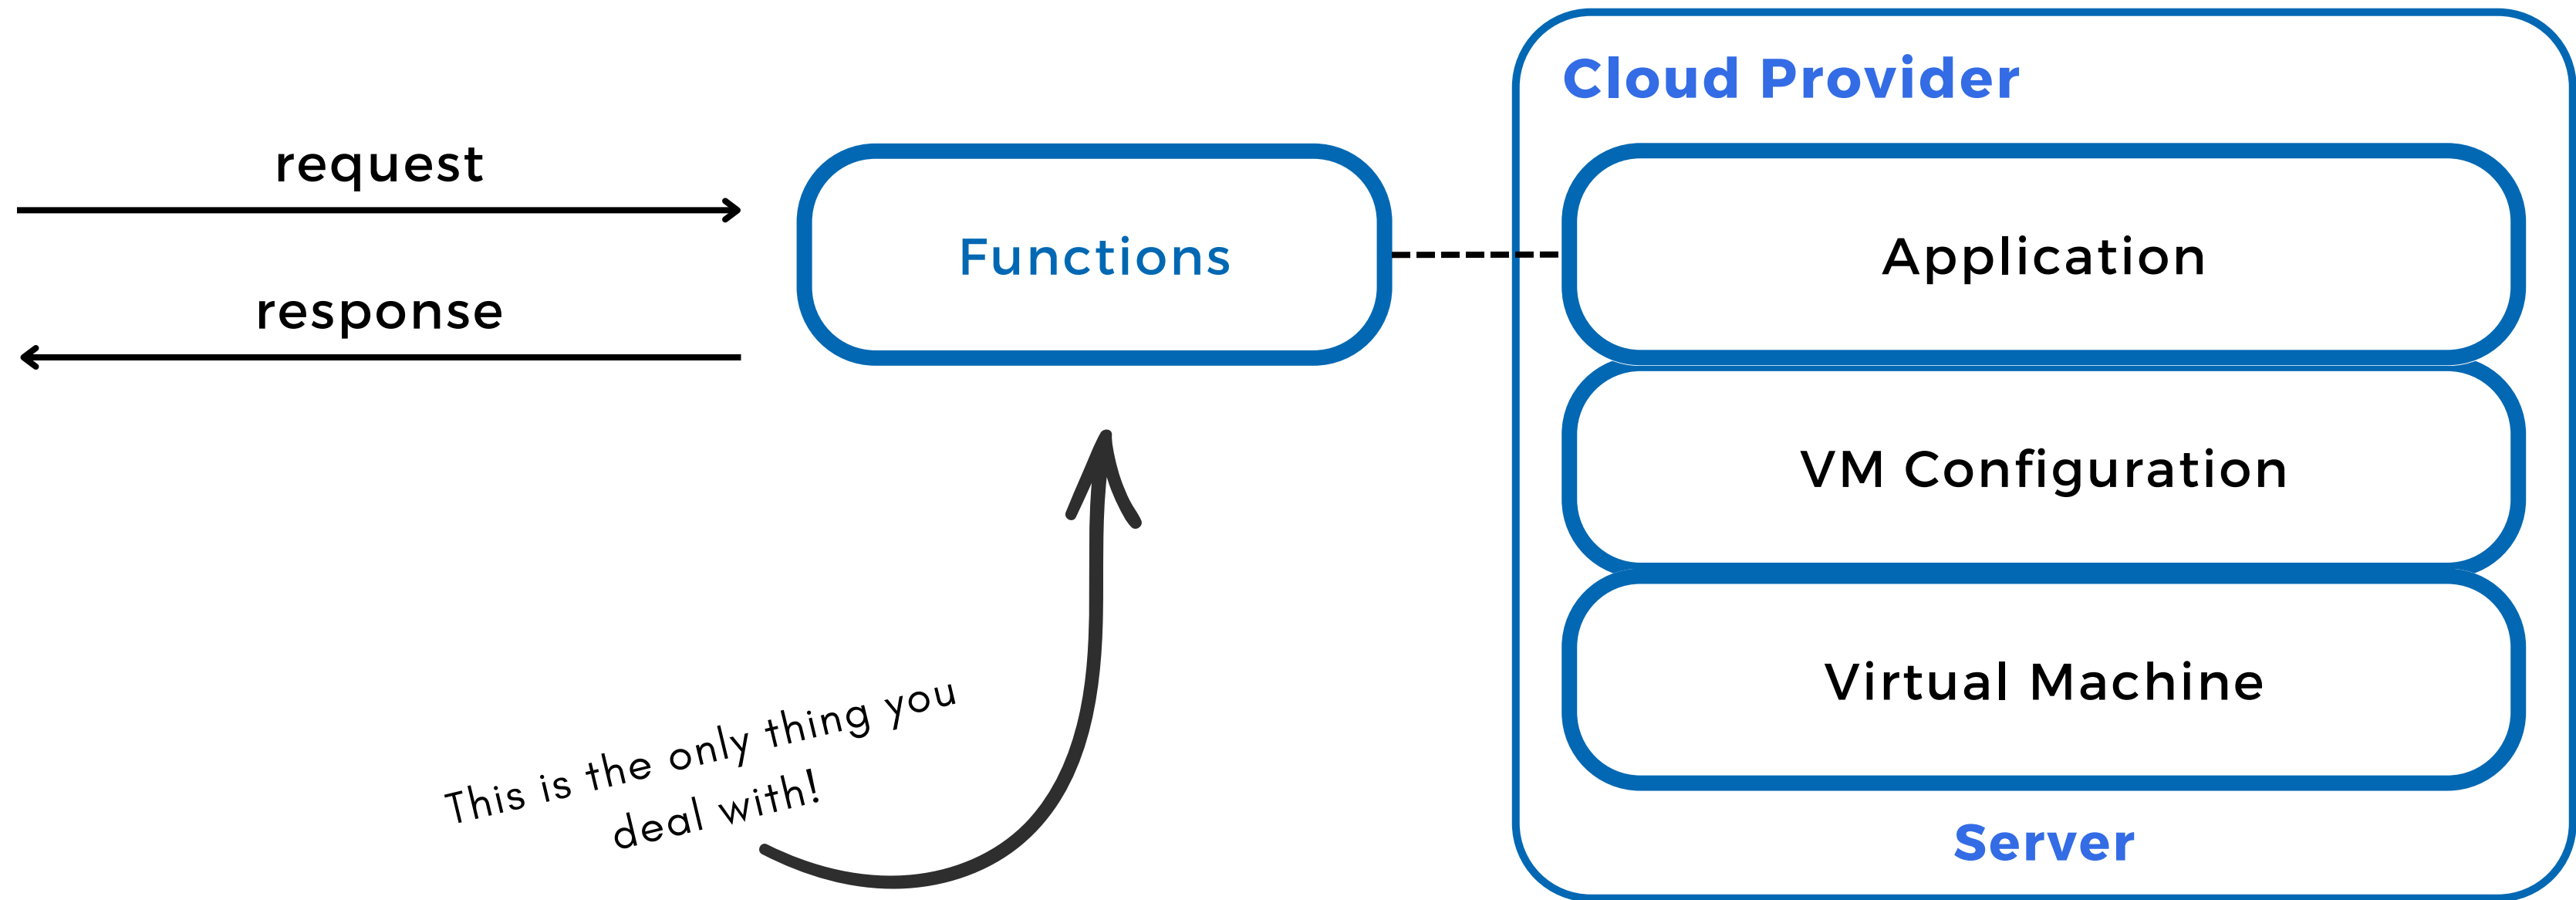

# WHAT IS Serverless?

# “With-server” Architecture

# Serverless Architecture

# Serverless Offerings

---

- AWS - Lambda
- GCP - Cloud Functions
- Azure - Serverless Functions
- Vercel - Serverless Functions

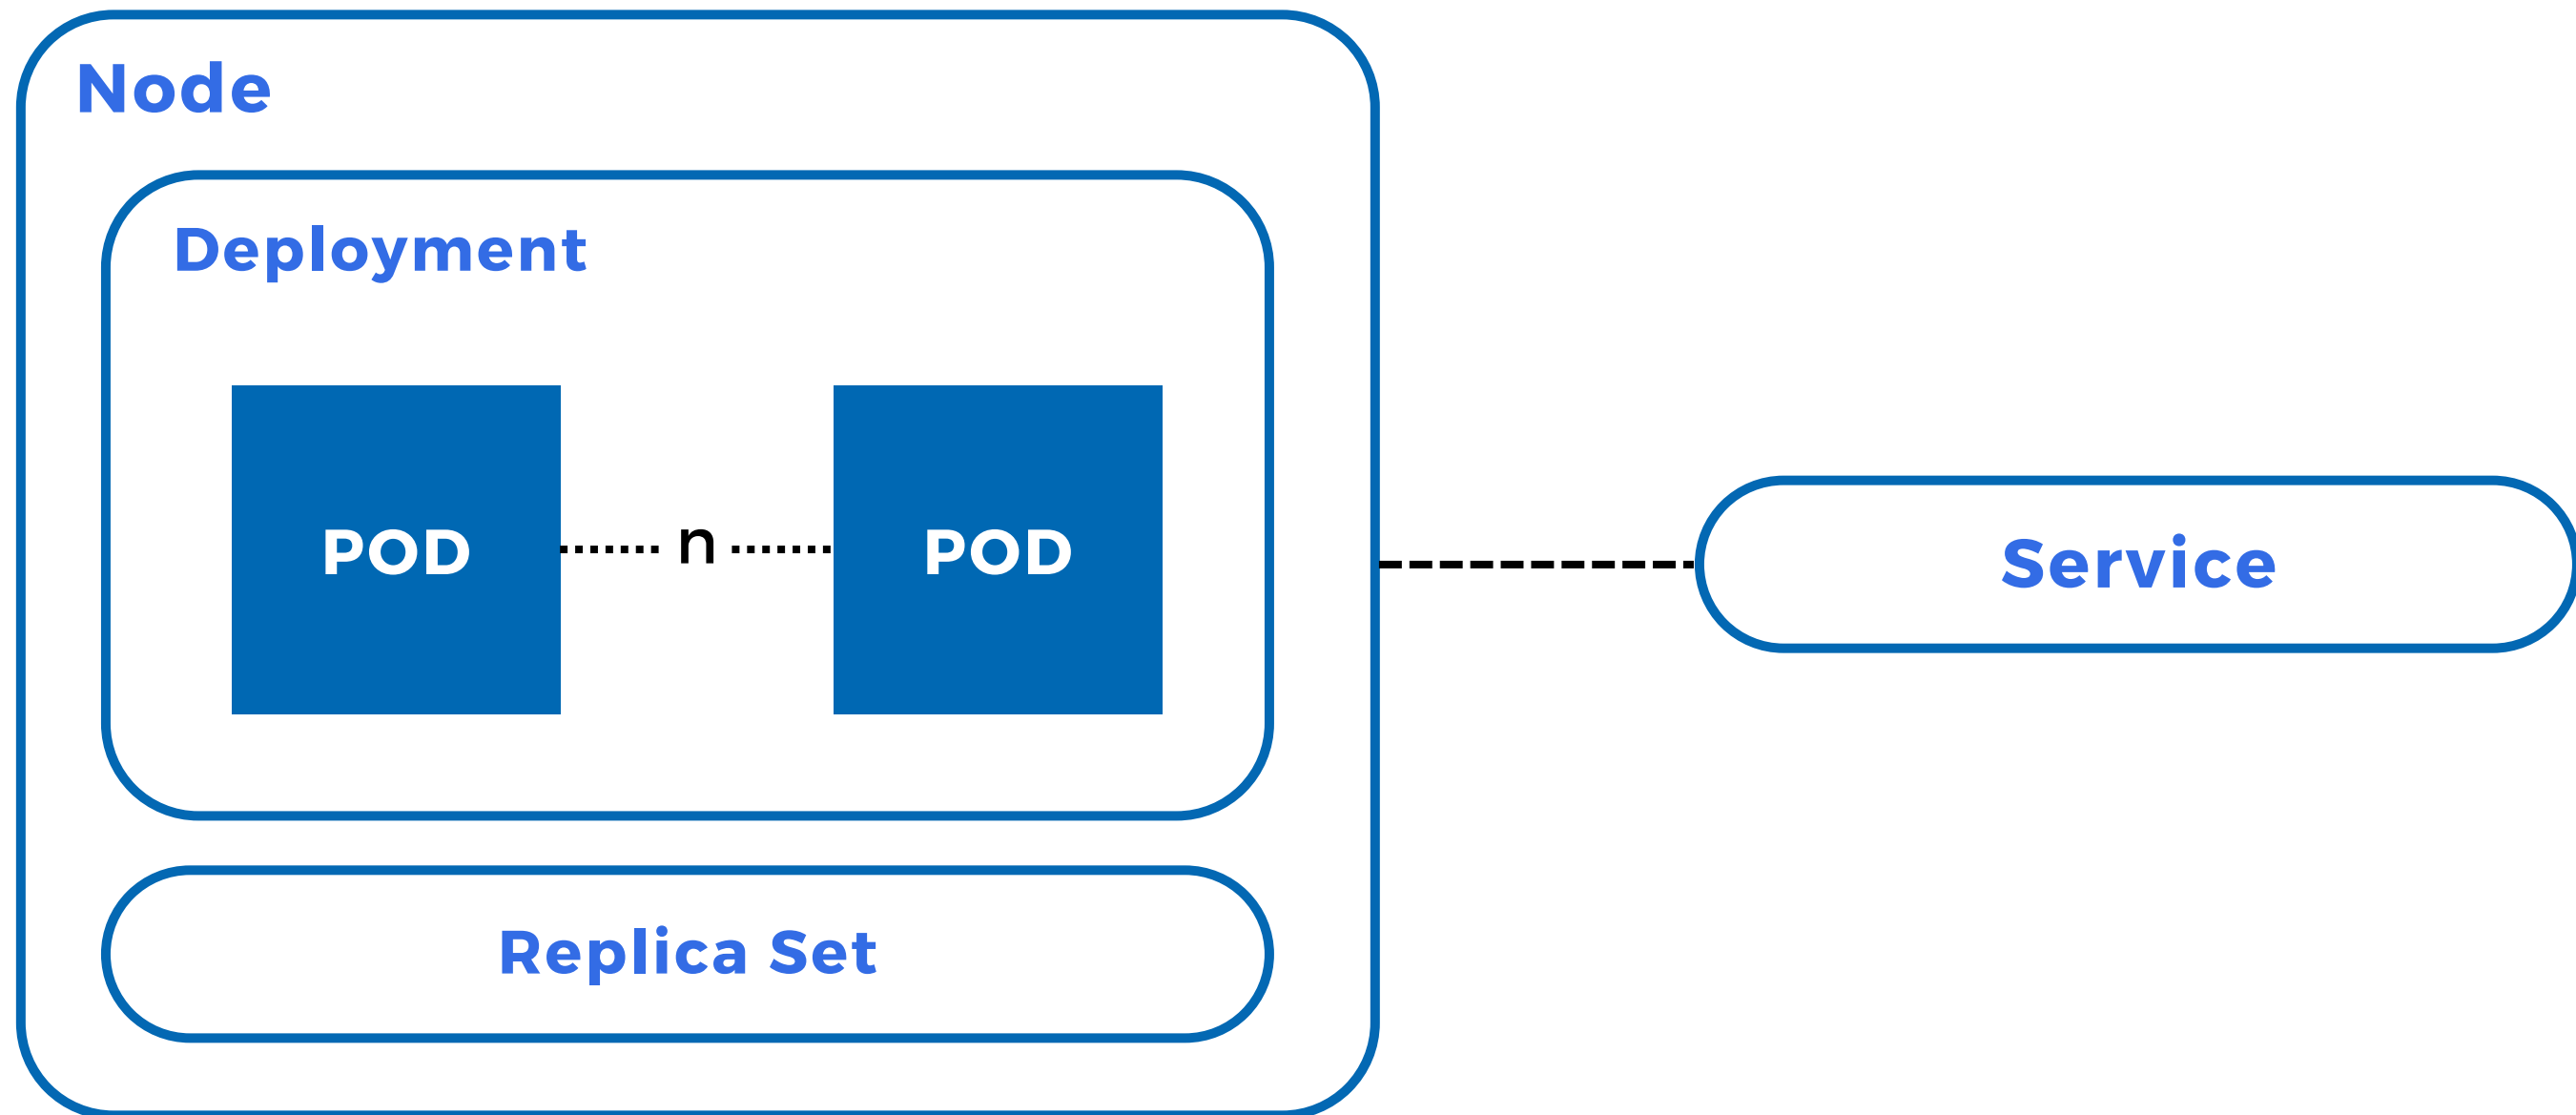

# INTRODUCTION TO

# Kubernetes

# Kubernetes Conceptual Overview

---

# WHAT IS Knative?

# Knative

---

- Open source serverless computing platform written Go for Kubernetes
- Serverless infrastructure right within your Kubernetes setup
- Control over the configuration of your serverless applications
- Two offerings for creating infrastructure for modern serverless workloads:

This is what we will be  
looking at today!

**Serving**

**Eventing**

# Features of Knative

---

Scale down to zero  
& up from zero

YAML based  
configuration

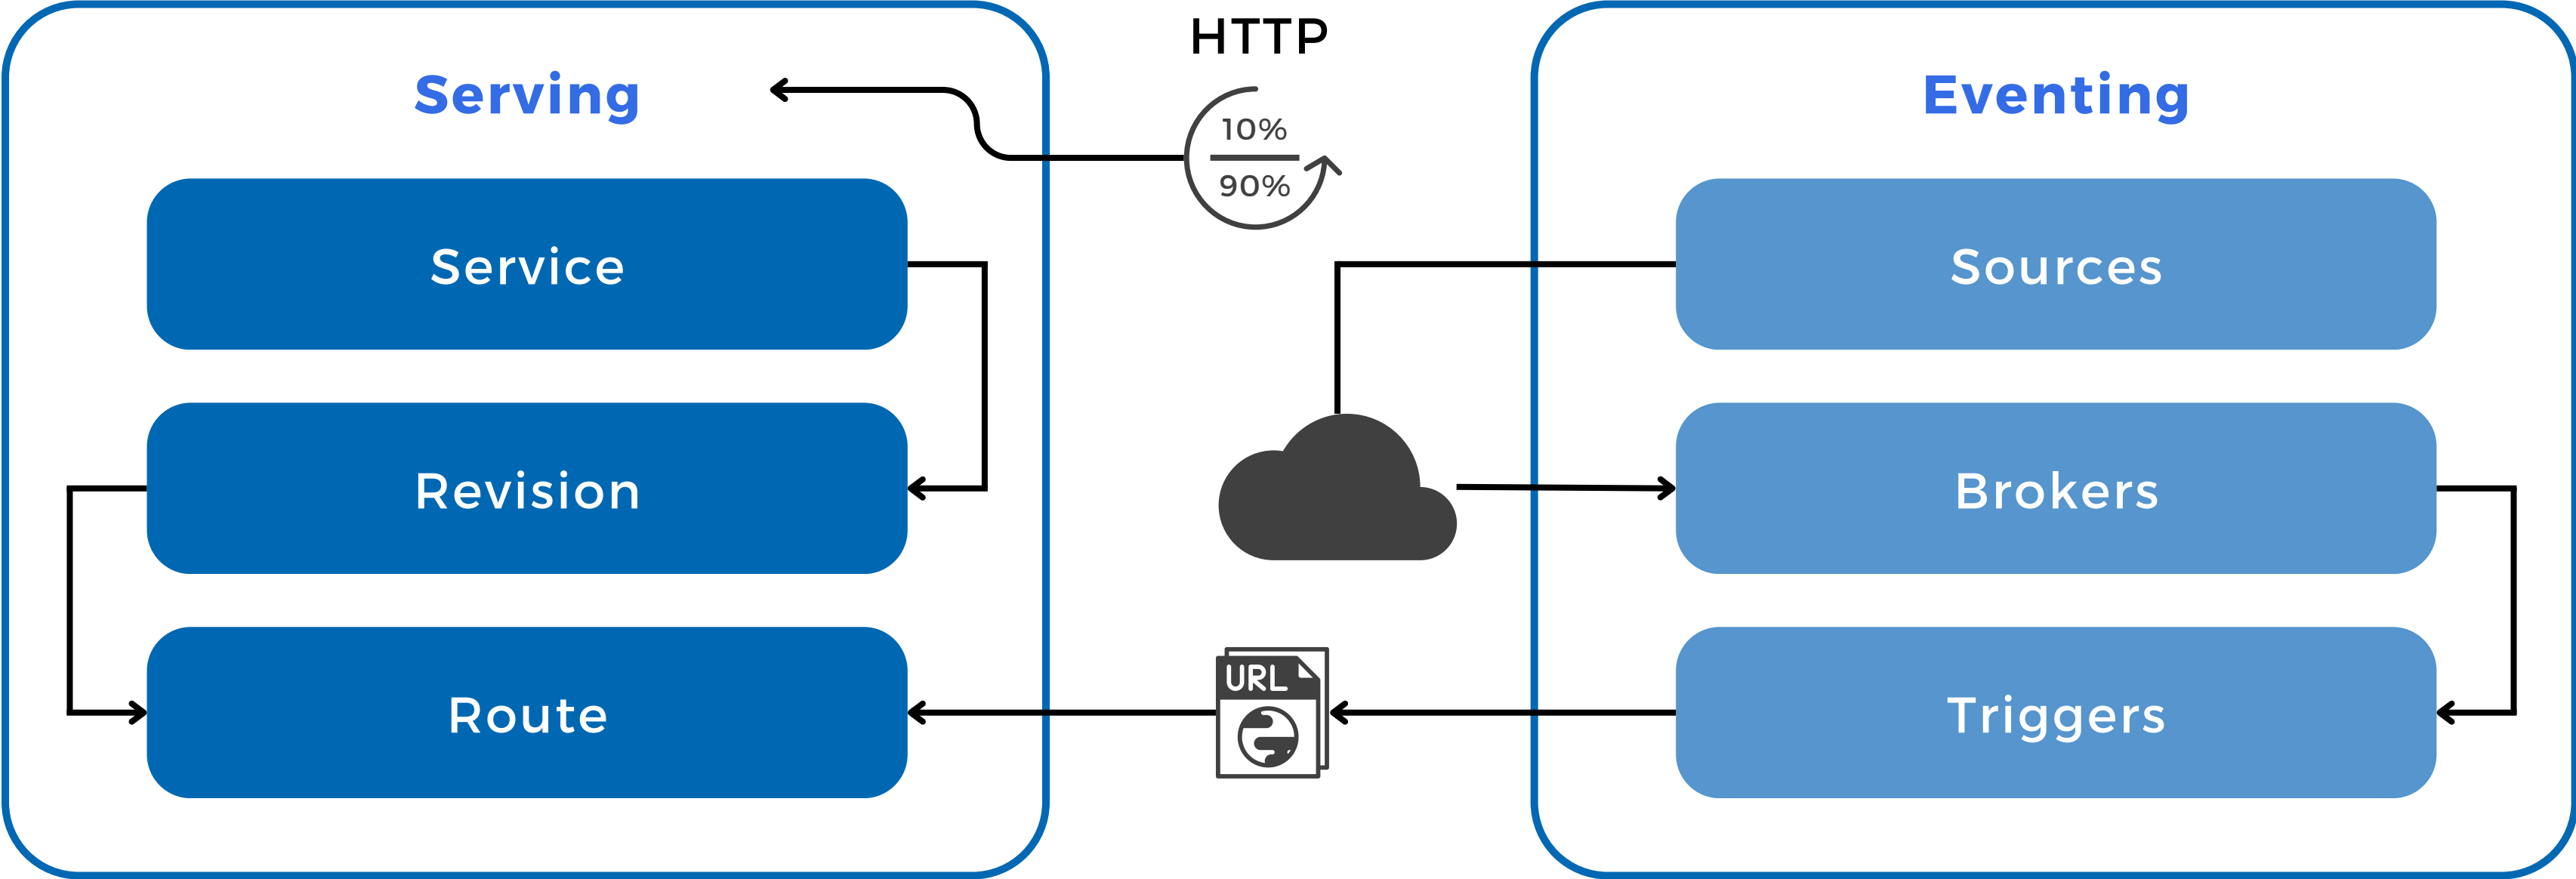

Choose different  
rollout strategies

Easily integrate  
with various tools

# Knative Components

*This is what we will be looking at today!*

# Prerequisites for the Demo

---

- Docker
- KinD (Kubernetes in Docker)
- Knative Client

Scan this to get the  
written instructions

# DEMO

# Recap

---

- **What is the “With-server” architecture**
- **What is Serverless architecture**
- **Introduction to Kubernetes**
- **What is Knative**
- **Features of Knative**
- **Knative Components**
- **Demo of Knative with Kubernetes**
