## Measuring Artists The Engineering Process

# How to measure dev work without killing the Muse

Focus on the team, the process, and the top productivity killers:

CLE TIME

**ONE METRIC:** 

## Cycle Time - the One Metric

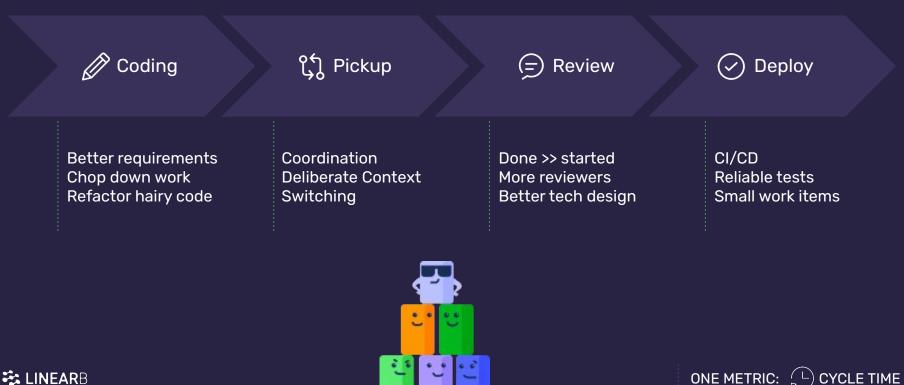

Time To Deliver A Standalone Piece of Work

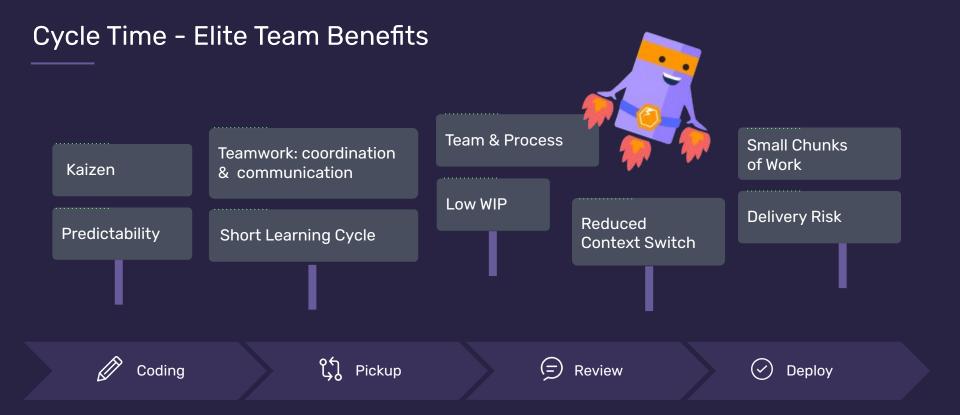

## Cycle Time - How to Win

ONE METRIC:

LINEARB

### **LINEAR**B

## **Benefits of Paying Attention**

#### Month 1

18.5%

avg cycle time improvement or more for 80% of orgs

## **57**%

avg cycle time improvement or more for 50% of orgs

### Month 2

20.5% avg cycle time improvement or more for 80% of orgs

63.2% avg cycle time

**improvement** or more for 50% of orgs

#### Month 3

**33.8%** avg cycle time improvement or more

for 80% of oras

## 75%

avg cycle time improvement or more for 50% of orgs

#### Month 4

**48**%

 $\begin{pmatrix} L \\ R \end{pmatrix}$ 

**ONE METRIC:** 

avg cycle time improvement or more for 80% of orgs

**75%** avg cycle time improvement or more for 50% of orgs

> BETTER CYCLE TIME

> > CYCLE TIME

Onboarding

-

## **Beyond Metrics**

Measuring is a great first step ... but it's not enough It's a (yet another) case of 80/20 ... know where your problems are

### $\textbf{Metrics} \rightarrow \textbf{Insights} \rightarrow \textbf{Action} \rightarrow \textbf{Automation}$

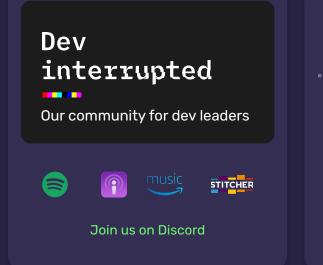

Software Delivery Intelligence

**ONE METRIC:** 

CYCLE TIME

https://boards.greenhouse.io/linearb

CYCLE TIN	1E		
🕒 <b>3</b> days	<b>6</b> hours avg	cycle time	
coding 16h	PICKUP 2h	REVIEW 37h	DEPLOY 90m
