

# Platform Engineering with GitHub Actions: A Prometheus Deployment Example

# Agenda

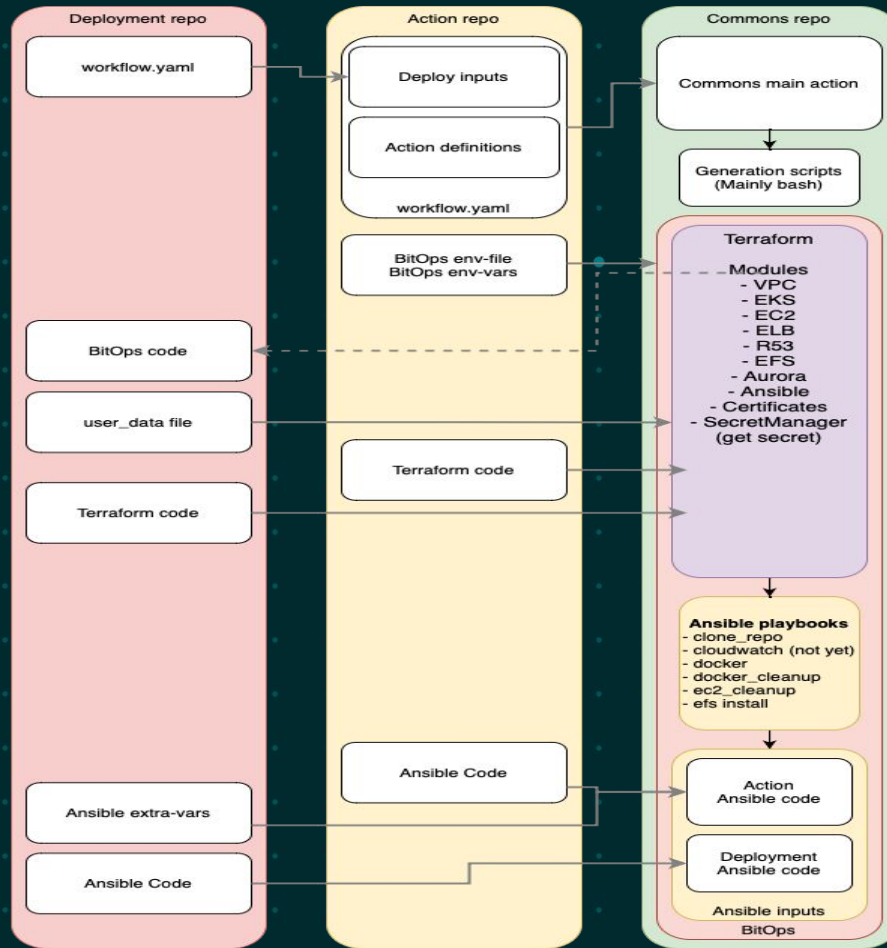

- Deploy Prometheus with Bitovi's seamless GitHub Action.
- Bitovi's open source "deploy prometheus" github action.
- Bitovi's commons framework

# Key-Takeaways

- Github Actions for platform engineering.
- Live deployment of Prometheus using Bitovi's Action.
- Insights into Bitovi's GitHub Action repository.
- Discover how Bitovi's Commons tool ensures seamless integration with IAC tools.

# Let's dive in

- Live GHA Prometheus deployment

# Some of our GitHub Actions

- React to GitHub Pages
- Storybook to GitHub Pages
- Static site to AWS (S3+CDN+R53)
- Docker Build Tag Publish
- Deploy Prometheus and Grafana
- Deploy Stackstorm Single VM
- Deploy Helm to EKS
- Deploy Docker to EC2
- Deploy EKS Cluster
- Deploy ECS Cluster
- Deploy Aurora DB Cluster
- Deploy RDS DB instance
- Deploy Redis DB Cluster (AWS)
- Deploy EFS
- Deploy GitHub Runner

**And a lot more!**

Search for **Bitovi** in the GitHub Actions Marketplace or reach us through Discord!

We  OpenSource

# Thanks!
