

Internet2.ai:

#1 company for **ISP Reputation**

Revolutionizing Cybersecurity

Leading innovator in ISP reputation and cybersecurity solutions.

Transforming Internet safety through AI-driven ISP rating.

The Cybersecurity Challenge

1

Current Landscape

Cybersecurity threats evolving at unprecedented rates.

2

Losing Ground

Traditional defences failing against sophisticated attacks.

3

Urgent Action Needed

New strategies required to turn the tide.

The Limitations of Destination-based Defense

1

Overwhelming Odds

Millions of attacks every day from different angles.

2

Breach guaranteed

The question is not if, but when.

3

Legal Complexities

International law struggles to address cyber threats.

The Root Cause: **Cyber Impunity**

Zero-Cost Attacks

Cybercriminals face minimal financial risks.

Anonymity Shield

Attackers hide behind complex networks.

Lack of Consequences

Insufficient deterrents for malicious actors.

Our **STRATEGIC** Approach

Enhanced Perimeter

Strengthening traditional security measures.

Source Proximity

Moving defenses closer to attack origins.

Additional Edge Control

The first layer of defense is at the ISP originating the traffic.

Innovative **ISP Rating** Technique

Malicious Traffic	Bad IP Reputation	Proprietary Algorithms
Real-time data collection	Historical ISP intelligence	Patent-Pending Application
Wide network coverage	Continuous updates	AI Driven Rating, Human oversight

Practical Use Cases

Traffic Monitoring

Real-time analysis of incoming and outgoing data.

Operational Limits

Implementing restrictions based on ISP ratings.

Risk Assessment

Evaluating potential threats from different sources.

Real-World Security Analogies

Restaurant Ratings

Would you dine at a 1.5-star establishment?

Football Defence

Effective strategies require multi-layered approaches.

Home Security

Protecting your network like securing your house.

Q&A: Your Path to Enhanced Cybersecurity

1

Expert Insights

Our team stands ready to address your queries.

2

Tailored Solutions

Discover how our technology fits your needs.

3

Next Steps

Learn about implementation and integration processes.

Thank You!
