

# Personalize Your Images with AI-Powered Features

Sharon Yelenik, API and DevX content writer

February 29th, 2024

# How do you handle your images?

# What if you have too many images to handle manually?

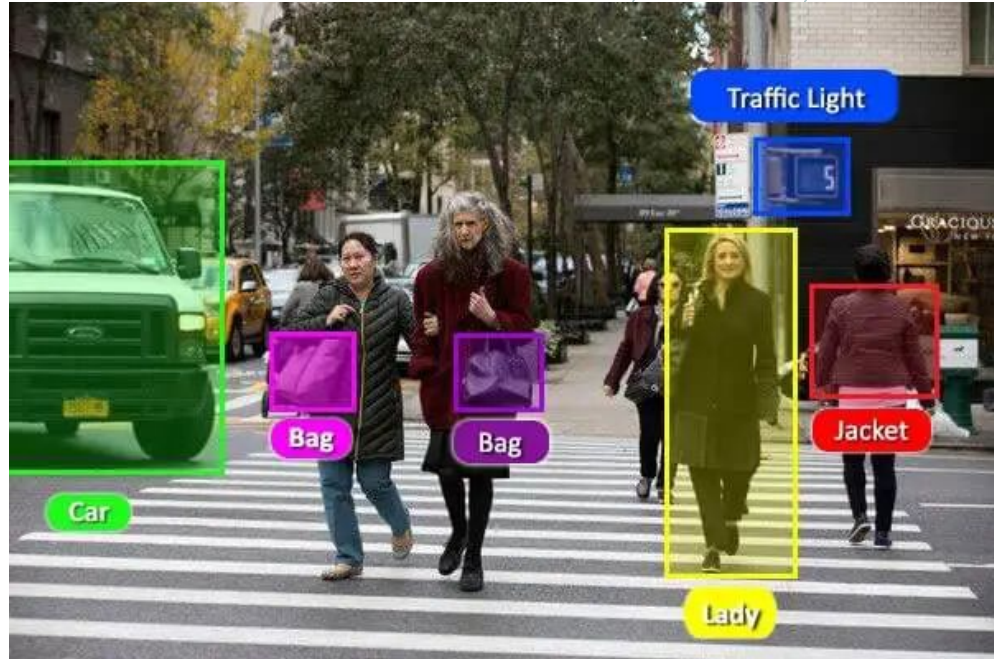

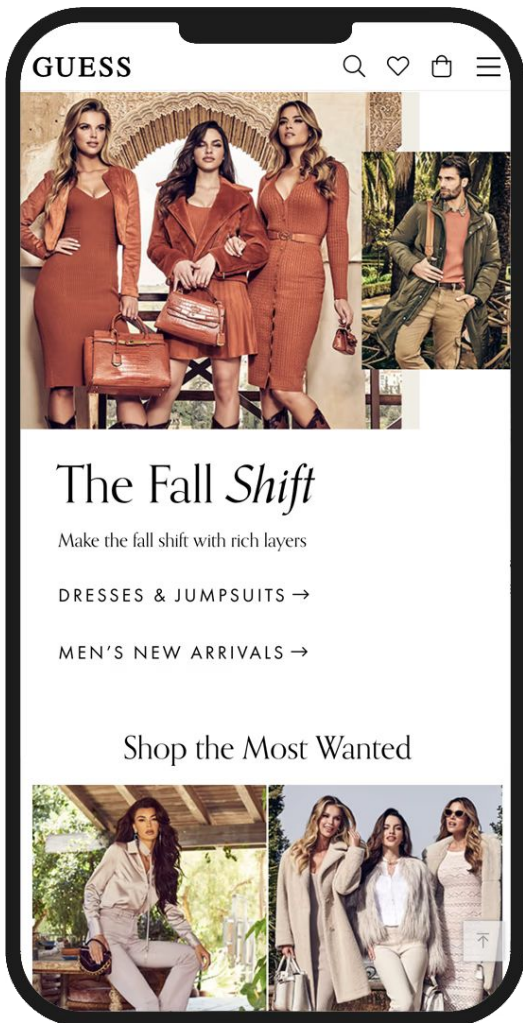

# AI Can Help You Manage Your Images

Base your programmatic decisions on:

- Moderation
- Object detection
- Auto tagging
- Face detection
- Color detection
- OCR

...and more

# Clouinary

- Provides you with a cloud to store all your images and videos (and other types of files).
- Helps with your images and videos from beginning to end: from uploading, storing, managing, transforming (editing), all the way to delivering your images and videos for websites and apps.
